Wyoming	Wanstead Farmers Co-operative Co. Ltd.	519-845-3301

Here's how you can do your part:

1. Rinse

Pressure rinse or triple-rinse your pesticide container to remove all remaining chemicals. Pour the rinsate into your sprayer tank so you'll get **all the product you paid for**. Improperly rinsed containers will be contaminated and may potentially cause further **contamination**, thus depots will turn you away.

2. Remove

Completely removing the paper booklet from your pesticide containers **saves recycling time and money**. Paper booklets interfere with the recycling process. When you **BRING THEM BACK CLEAN**, with the paper booklet removed, you make it possible to recycle efficiently and economically.

3. Return

Return **clean, empty containers, with no paper booklets** to your local collection depot as listed above.

THANK YOU!
