

SOYBEAN CONVERSION TABLE - APPROACH #1

September 1, 2011

WET KILOGRAMS TO DRY TONNES - Please note there are NO ALLOWANCES for INVISIBLE LOSS built into the divisor. The divisor, when divided into the total kilograms in a load, gives the number of dry tonnes in a load. Maximum drying charges assessed per tonne of dry soybeans and includes allowances for invisible loss.

Moisture(%)	Kilograms Wet Soybeans Divisor	Maximum	Maximum	Maximum	Maximum	Maximum	Maximum	Maximum	Maximum	Maximum	Maximum	Maximum
		Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne	Drying Charge per tonne
